

Index to Biographical Information

The biographical information listed in this index may be found within two locations within the Historical Society Library. Those indicated to be in the **Bookcases** are in looseleaf binders along the South wall of the library and contain a very sizeable amount of information about the primary and related family lines. The biographical information indicated to be found in the **Hanging Files** will be found in the two drawer file cabinets on the North Wall of the historical society library under the Moore's Mill Diarama. The information in these hanging files is significantly less sizewise than the looseleaf binders and will amount to one or two pages up to twenty to thirty pages.
